

# BootBOSS™

## BootBoss turns your disorganised work boot storage into safe and efficient spaces.

🔒 Lock up with BootBoss Security (shown). Non-lockable and customisation options are also available.

Work boots are one of the most likely items to be found out of place. Hygiene and smell are good reasons people don't want them in their lockers, and as such they often don't have a secure designated space within locker rooms.

As some of the most important PPE, boots should have a spot that is individual to each worker that is out of the way of traffic and reserves use for their owners only. If your workers boots are stored in a locker room or on a vehicle you will identify with one or all of these following problems:

- ✔ Work boots on work sites are often stored haphazardly causing WHS risk.
- ✔ Boots are often lost or misplaced causing frustration and work start delays.
- ✔ Lost and misplaced boots are a significant cost to your business.
- ✔ Work boots left on site are typically unattended 70+ % of the time.
- ✔ When stored poorly, work boots become unhygienic, a trip hazard and go 'walk about'.

### BootBoss is your Solution

- ✔ A simple, safe, and effective work hanging solution – no longer are boots left to trip over.
- ✔ When boots are stored in a central well-ventilated area they have a greater chance to dry out overnight.
- ✔ When the worker returns to site they know their boots will be where they left them.
- ✔ With fewer boots lost the cost of replacement is reduced representing savings to the bottom line.
- ✔ Versatile design allows for secure organisation of work boots not only in lockers but also on walls, vehicles and other locations.

“ BootBoss has so many avenues for making a difference, from being locally manufactured, to employing a diverse range of people, to partnering with and supporting other organisations that also seek to make a positive impact on worksites.

I am excited to be bringing a simple, effective solution to a common problem. If we can help workers start and finish their day on the right foot (in the right boots!), plus do plenty of good for those that need it, then I will consider the BootBoss a great success. ”

# BootBOSS™

# BootBoss brings simple work boot storage to transform your space.

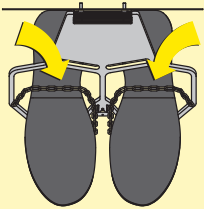

▶ Lock up with BootBoss Security (shown). Non-lockable and customisation options are also available.

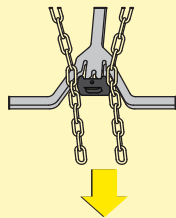

▶ Work boots installed and secured with personal isolation lock.

▶ Hinged frame allows boots to be installed side by side on locker doors. When raised, the boots are clear and the door easily opens.

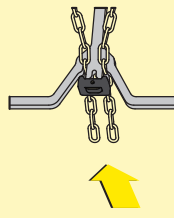

## Fitting Chains (with BootBoss Security)

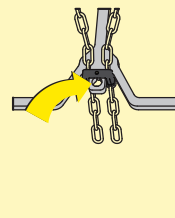

▶ Pass chain over narrow section

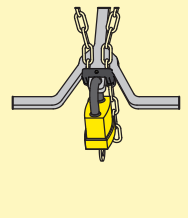

▶ Slide collar down, pull chain tight

▶ Push chain into slots

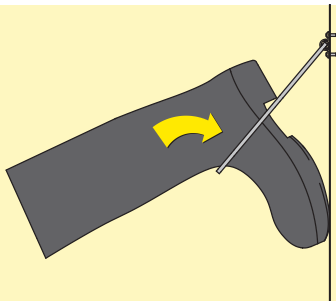

▶ Slide collar up

▶ Insert padlock to secure

## Fitting Boots (all versions)

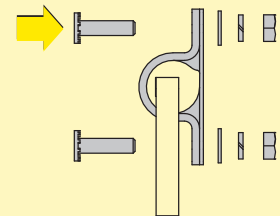

▶ Toes first through front  
• Quick and convenient

▶ Toes first through rear  
• For use with chain  
• Compact  
• Better drainage

## Fitting Hinge (all versions)

▶ Apply pressure to clinch screw head while fitting nuts and the screw will lock into the hinge plate.
